Assignment for Monday, February 6

Before class, do the following:

1. Continue to review the notes on Computing, Loading Data, and Histograms in R. These notes contain a lot of new ideas that we'll use throughout the semester. Most importantly, you'll use these ideas to do the data analysis in your two writing assignments (40% of your grade). Continue to practice and come to office hours to clear up any confusion.
2. Do Computing Assignment 3. This is graded and due on February 6 by the beginning of class. Follow the instructions on the assignment to submit using eCampus.
3. Read chapter 4 of FPP and do the assigned exercises (see the pdf posted near the top of the course webpage). Remember that we'll discuss the exercises in class and that the exercises are excellent preparation for the exam. Please come to class prepared to discuss.
4. Continue reading *Foundation*. Finish Part 4 by Wednesday, February 8. Continue thinking about the relevant questions from the "Discussion Questions for *Foundation*" available on the course webpage. The book will be covered on Exam 1 on February 22.
