

Assignment for Wednesday, January 25

Before class, do the following:

1. Make sure you have R and RStudio installed and remember to bring your computer to class! Make sure you can open RStudio. R needs to be installed, but it runs only in the background.
2. Preview notes on Computing. Since this material is a little bit technical and difficult, you may wish to read these notes more carefully and try some of the code in RStudio. Feel free to go ahead and work some of the review exercises in the notes.
3. Continue to read *Foundation* with an eye toward the discussion questions. Part 2 should be completed by January 27 and the book will be covered on Exam 1 on February 22.
