

Assignment for Monday, January 30

Before class, do the following:

1. Do R Assignment 2. This is graded and due on January 30 at the beginning of class.
2. Read chapters 1 and 2 of Freedman, Pisani, and Purves (FPP) and do the exercises given on the course webpage. This is our first reading from the textbook. I expect you to read this carefully and I do not plan to lecture on the material. We will discuss some of the exercises in class and you should consider them excellent preparation for the exam.
3. Preview the notes on Causal Inference.
4. Continue to read *Foundation* with an eye toward the discussion questions. Part 3 should be completed by February 3 and the book will be covered on Exam 1 on February 22.
