

Assignment for Wednesday, January 25

Before class, do the following:

1. Preview notes on Computing. Since this material is a little bit technical and difficult, you may wish to read these notes more carefully and try some of the code in RStudio.
2. Make sure you have R and RStudio installed and remember to bring your computer to class! Make sure you can open RStudio. R needs to be installed, but it runs only in the background.
3. Continue to read *Foundation* with an eye toward the discussion questions. Part 2 should be completed by January 27 and the book will be covered on Exam 1 on February 22.
