Assignment for Friday, February 3

Before class, do the following:

1. Preview the notes on Histograms in R. At some point, either before or after class, you should read these notes *carefully* (maybe both). This is the last set of notes on R with a lot of new ideas, so continue working hard. It will get easier.
2. Finish Part 3 of *Foundation* (pp. 97-169). The book will be covered on Exam 1 on February 22. Answer the relevant questions from the "Discussion Questions for *Foundation*" available on the course webpage.
3. See the additional review questions at the bottom of the course webpage.
